Phase 1 Car Wash Industry
COVID-19 Requirements

Safety and Health Requirements

All car washes have a general obligation to keep a safe and healthy facility in accordance with state and federal law, and comply with the following COVID-19 worksite-specific safety practices, as outlined in Governor Jay Inslee’s “Stay Home, Stay Healthy” Proclamation 20-25, and in accordance with the Washington State Department of Labor & Industries General Requirements and Prevention Ideas for Workplaces and the Washington State Department of Health Workplace and Employer Resources & Recommendations at https://www.doh.wa.gov/Coronavirus/workplace.

Employers must specifically ensure operations follow the main L&I COVID-19 requirements to protect workers, including:

- Educate workers in the language they understand best about coronavirus and how to prevent transmission and the employer’s COVID-19 policies.
- Maintain minimum six-foot separation between staff and customers in all interactions at all times. When strict physical distancing is not feasible for a specific task, other prevention measures are required, such as use of barriers, minimize staff or customers in narrow or enclosed areas, stagger breaks, and work shift starts.
- Provide personal protective equipment (PPE) such as gloves, goggles, face shields and face masks as appropriate or required to employees for the activity being performed. Cloth facial coverings must be worn by every employee on the jobsite unless their exposure dictates a higher level of protection under Department of Labor & Industries safety and health rules and guidance. Refer to Coronavirus Facial Covering and Mask Requirements for additional details. A cloth facial covering is described in the Department of Health guidance, https://www.doh.wa.gov/Portals/1/Documents/1600/coronavirus/ClothFacemasks.pdf.
- Ensure frequent and adequate hand washing with adequate maintenance of supplies. Use disposable gloves where safe and applicable to prevent transmission on tools or other items that are shared.
- Establish a housekeeping schedule that includes frequent cleaning and sanitizing with a particular emphasis on commonly touched surfaces.
- Screen employees for signs/symptoms of COVID-19 at start of shift. Make sure sick employees stay home or immediately go home if they feel or appear sick. Cordon off any areas where an employee with probable or confirmed COVID-19 illness worked, touched surfaces, etc. until the area and equipment is cleaned and sanitized. Follow the cleaning guidelines set by the CDC to deep clean and sanitize.

A site-specific COVID-19 Supervisor shall be designated by the employer at each job site to monitor the health of employees and enforce the COVID-19 job site safety plan.
A worker may refuse to perform unsafe work, including hazards created by COVID-19. And, it is unlawful for their employer to take adverse action against a worker who has engaged in safety-protected activities under the law if their work refusal meets certain requirements.

Employees who choose to remove themselves from a worksite because they do not believe it is safe to work due to the risk of COVID-19 exposure may have access to certain leave or unemployment benefits. Employers must provide high-risk individuals covered by Proclamation 20-46 with their choice of access to available employer-granted accrued leave or unemployment benefits if an alternative work arrangement is not feasible. Other employees may have access to expanded family and medical leave included in the Families First Coronavirus Response Act, access to use unemployment benefits, or access to other paid time off depending on the circumstances.

**All car washing business activities are required to comply with the following COVID-19 worksite-specific safety practices:**

Below is a list of requirements for car washing activities to follow in order to provide a safe back to work environment for employees and customers.

Always educate your employees on the company’s COVID-19 Safety Plan. If possible, implement daily all-hands communications within company to inform, educate and reinforce standard operating procedures, safety plan and possible next steps. The situation remains dynamic and employees need to understand this is a fluid action plan that is being discussed regularly and may change frequently. Clearly communicate changes as needed.

**Social Distancing:**

1. Gatherings of any size must be prevented by taking breaks, performing activities and lunch in shifts. Any time two or more persons must meet, ensure minimum 6-feet of separation.

2. Identify and control “choke points” and “high-risk areas” at locations where workers and members of the public typically congregate so that social distancing is always maintained. Consider relocating from small areas into larger rooms to accommodate more area for social distancing.

3. Minimize interactions during activities; ensure minimum 6-foot separation by physical barriers, and/or marking floors with tape. Limit the number of participants based on facility size and activities to allow for 6-foot separation.

4. Arrange furniture to encourage social distancing.

5. Require customers to make reservations for in-person services.

6. Station employees near vacuum areas to clean nozzles after every use.
7. Closed every other vacuum stall for customers in situations where customers would otherwise be unable to practice social distancing.

8. Limited interior vehicle cleaning to only one employee at a time.

9. Customers should line up in their cars at facilities with automated car washing.

**Sanitation and Cleanliness:**

10. Frequently clean and disinfect frequently touched objects and surfaces such as workstations, keyboards, telephones, handrails, machines, shared tools, elevator control buttons, and doorknobs and restrooms.

11. Regularly clean payment terminals, vacuum hoses, bay guns, wash selector equipment, vending, and cleaning machines.

12. Make disinfectants available to workers and customers throughout the location and ensure cleaning supplies are frequently replenished.

13. Tissues and trash cans must be made available throughout the worksite.

14. If possible, use automated payment solutions to prevent need to touch payment terminals. Otherwise, clean POS terminals regularly.

**Sick Employee Plan:**

15. Screen all workers at the beginning of their day by asking them if they have a fever, cough, shortness of breath, fatigue, muscle aches, or new loss of taste or smell.

16. Ask employee to take their temperature at home prior to arriving at work or take their temperature when they arrive. Thermometers used shall be ‘no touch’ or ‘no contact’ to the greatest extent possible. If a ‘no touch’ or ‘no contact’ thermometer is not available, the thermometer must be properly sanitized between each use. Any worker with a temperature of 100.4°F or higher is considered to have a fever and must be sent home.

17. Create policies which encourage workers to stay home or leave the location when feeling sick or when they have been in close contact with a confirmed positive case. If they develop symptoms of acute respiratory illness, they must seek medical attention and inform their employer.

18. Have employees inform their supervisors if they have a sick family member at home with COVID-19. If an employee has a family member sick with COVID-19, that employee must follow the isolation/quarantine requirements as established by the State Department of Health.

19. Instruct workers to report to their supervisor if they develop symptoms of COVID-19 (e.g., fever, cough, shortness of breath, fatigue, muscle aches, or new loss of taste or smell).
smell). If symptoms develop during a shift, the worker should be immediately sent home. If symptoms develop while the worker is not working, the worker should not return to work until they have been evaluated by a healthcare provider.

20. If an employee is confirmed to have COVID-19 infection, employers should inform fellow employees of their possible exposure to COVID-19 in the workplace but maintain confidentiality as required by the Americans with Disabilities Act (ADA). The employer should instruct fellow employees about how to proceed based on the CDC Public Health Recommendations for Community-Related Exposure.

Training:

21. All on-site employees must be trained on the worksite’s policies, these requirements and all relevant sanitization and social distancing protocols. They must also be trained about COVID-19 and how to prevent its transmission. This can be accomplished through weekly safety meetings, where attendance is logged by the system, supervisor, or COVID site supervisor.

Visitor Log:

22. [Deleted] Please refer to the memo on customer logs.

No car washes may operate until they can meet and maintain all the requirements in this document, including providing materials, schedules and equipment required to comply. Additional considerations are made as suggestions and may be adopted, as appropriate.

All issues regarding worker safety and health are subject to enforcement action under L&I’s Division of Occupational Safety and Health (DOSH).

- Employers can request COVID-19 prevention advice and help from L&I’s Division of Occupational Safety and Health (DOSH).

- Employee Workplace safety and health complaints may be submitted to the L&I DOSH Safety Call Center: (1-800-423-7233) or via e-mail to adag235@lni.wa.gov.

- General questions about how to comply with the agreement practices can be submitted to the state’s Business Response Center at https://coronavirus.wa.gov/how-you-can-help/covid-19-business-and-worker-inquiries.
