

Rate of newly detected COVID-19 cases - specimen collection date from Washington State Department of Health

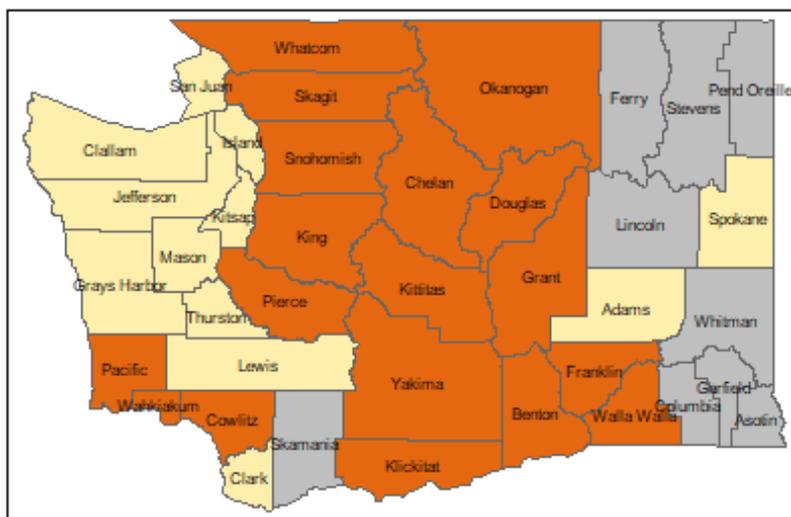

Crude average daily rate of newly diagnosed COVID-19 cases over the past 14 days

This table shows the crude average daily rate for COVID-19 cases with a specimen collection date between 2020-04-28 and 2020-05-12. The average daily number of newly diagnosed cases, population derived from OFM 2019 population data, crude rate per 100,000 people and 95% confidence intervals are included for each county with new cases over the past 14 days and the state total. Cases without a county assignment are only included in the state total.
